WELLNESS LIFESTYLE REAL ESTATE & COMMUNITIES

SĀDHU[®]
BLISSFUL LIVING
GLOBAL WELLNESS

The wellness market is having a continuous growth that denotes the vital importance it brings to real estate investments. In the coming years we will see a substantial increase in the prioritization of health and wellness when defining an investment.

The trends are oriented towards the use of clean and natural products in all areas, the connection with nature, alternative treatments and therapies, meditation and yoga practices, sports and outdoor recreation spaces and all those services that generate improvements in the quality of life.

At SADHU we give great importance to all this and we have taken it into account in the conceptualization of the design and the overall experience.

GENERATING HEALTH AND WELLNESS AROUND THE WORLD

Our brand benefits those who choose our destinations to live, enjoy and heal.

We discover wonderful places in the world, investing in them, enjoying their progress, growth, tourist power and investment attraction, which are representative flagship of SADHU Global Wellness.

The organic transformation of the world has provoked modifications that are changing the perception of life, throughout time.

In the evolution, our projects will be very important, generating health and wellness. Resulting in a great contribution in the quality of life to the user's experience and valuation of real estate investments.

OUR CORPORATE IDENTITY BRINGS MULTIPLE BENEFITS.

- ③ SADHU provides each destination with a unique proposal, a clear vision of values, supporting all its business units.
- ③ Its purpose is to create a social and corporate conscience.
- ③ It designs globally conscious, health and wellness communities.
- ③ It achieves public recognition, creating awareness and generating customer loyalty.
- ③ Its destinations form a global space and each one of them reflects its tangible and intangible corporate values.
- ③ The architectural design is adapted to each region, adding value to its heritage.
- ③ The different destinations create a network of essential value and strong advantages that capitalize on them, creating a chain of healthy and innovative experiences.

OUR VALUES.

EQUILIBRIUM: To live in harmony with nature, the activities of the community will be developed in such a way that they are compatible with the maintenance and improvement of the ecological environment.

COMMITMENT: With the degree of environmental protection in order to maintain a healthy environment in which to live, learn and work.

CONNECTION: With our inner Self and with nature.

INCLUSION AND EQUITY: Indispensable requirements for society and sustainable development, just as development cannot be solely from an economic point of view, nor can sustainability refer exclusively to the protection of the environment.

An aerial photograph of rolling green hills, likely in the Philippines. The hills are covered in lush green grass and are illuminated by warm, golden light, possibly from the setting or rising sun. In the lower foreground, a herd of sheep is grazing on a hillside, with a person standing nearby. The overall scene is peaceful and natural.

AN INVESTMENT IN OUR WELL-BEING.

We radically transform the essence of residential real estate into a new concept of wellness. The home, the community and the surrounding environment directly affect our behaviors and lifestyle, determining health outcomes.

At SADHU, we address health challenges by placing people's quality of life at the center of project conception, design and creation as well as their community environment. We represent the global change that arises from the need to build a new world of multidimensional wellness, integrating elements of the green/sustainable building movement, organic design, conscious urbanism and organic farming. We adapt, blend and incorporate the conceptualization of a residential community in which to invest in your well-being.

SADHU joins groups of entrepreneurs around the world with the mission to create forests and jungles.

Planting more trees is the way we can reduce CO2 emissions and have a healthy ecosystem. Prevent, stop and reverse the degradation of ecosystems around the world.

The health of our ecosystems directly depends on the health of our planet and its inhabitants.

SĀDHU®
BLISSFUL LIVING
GLOBAL WELLNESS

We intend to become a global brand with different places in the world that offer the possibility to discover different destinations and live cultural and wellness experiences.

SĀDHU
BLISSFUL LIVING
TULUM

SADHU Tulum is immersed in the heart of the Mayan jungle, a place that invites you to discover all its spaces, colors, sounds, aromas, ancestral teachings, having the feeling of being in "The Anteroom of Paradise". This way you can rekindle your consciousness in relation to all the blessings that Pachamama continually gives us.

The Riviera Maya is a natural treasure that has the most varied ecosystems on the planet. Its richness is extraordinary, the forms, geological processes and deep energies dazzle us at every step. Its archaeological areas appear in secret corners of the jungle, where ancient cultures have left traces of a legacy that remains alive to this day.
